

# DEVELOPING AN OUTSTANDING MASTER PLAN

Stirling Developments actively seek maximum creative input in our quest to deliver an exemplar development

Organising master plan workshops and design seminars, involving architects and designers from across Europe as well as local officials and representatives. Resulting in a highly creative, well considered, robust Master Plan

Most design meetings are held on site to gain an intimate and complete understanding of the project and its context

Continuous Study tours have been carried out, involving over 50 tours within the UK and abroad to some of the World's best developments

Stirling Developments organised and sponsored a student design competition, (offering Scotland's highest prize money), to encourage a talented, younger generation to participate in the project
